

CLIENT DASHBOARD

- HealthLinX uses our proprietary software, ScripLogic, to analyze, visualize, and report your claims data. ScripLogic allows us to upload claims data, and view this data via charts, graphs, and essential KPI's all in one place. At a glance, this dashboard can give us insight on how your plan is performing, which helps us monitor and optimize your plan.
- HealthLinX now offers a splash page version of this dashboard to our clients. The splash page will give you access to the same data visualizations that we use to manage your plan. This gives you the same insight as us and gives you the opportunity to see how your plan is performing without waiting for a report or reaching out to us.
